

## Bokeh

In this task, we want to create a gridplot of four pie charts that display income, expense, and profit data for four restaurants over the course of a year.

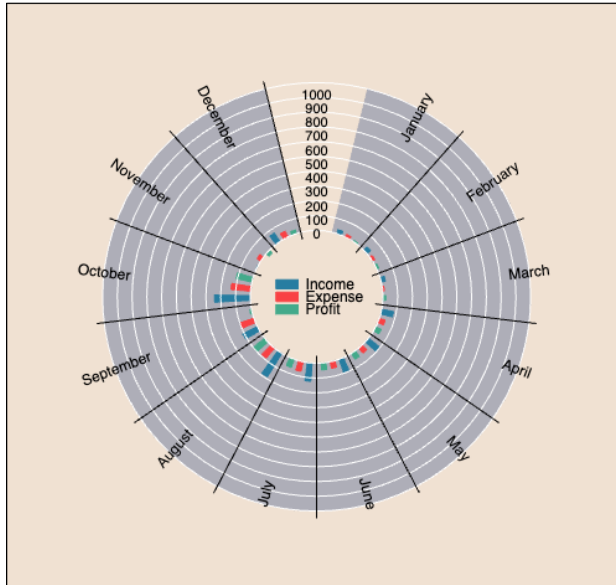

You have found code that creates a pretty similar output (see Start Output), but you want to create something like the Goal Output.

Start Output

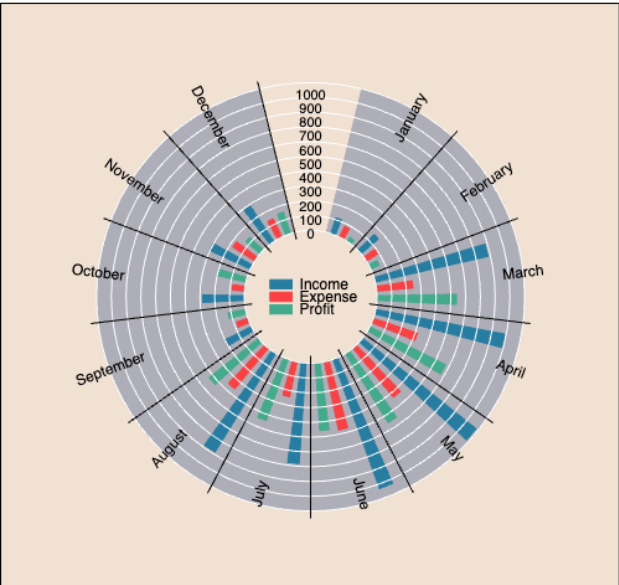

## Goal Output

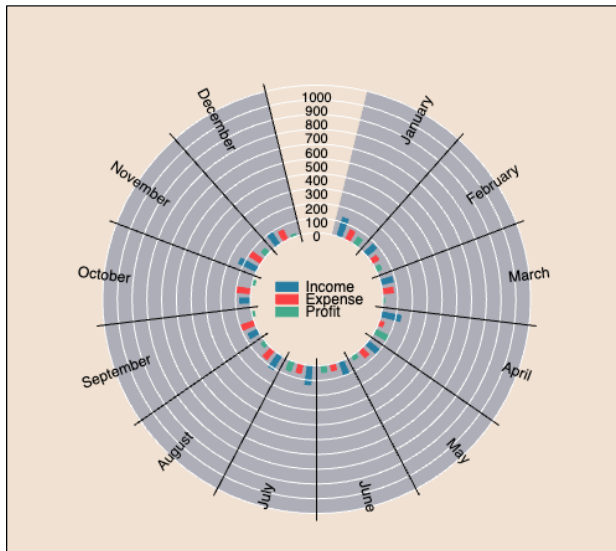

Cafe

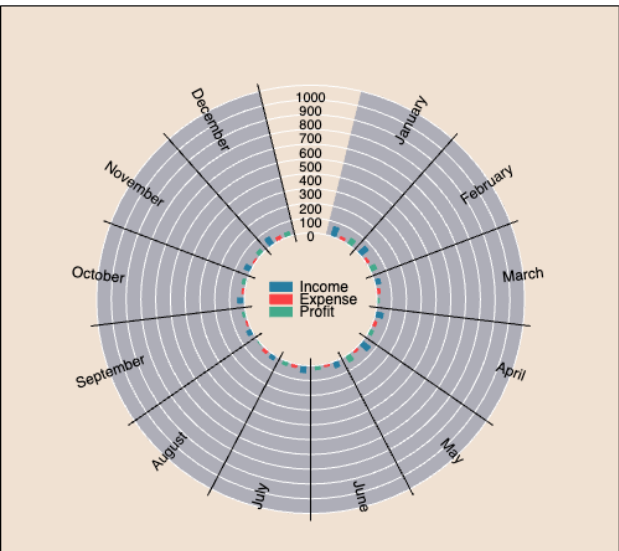

Bistro

Food Truck

Pub

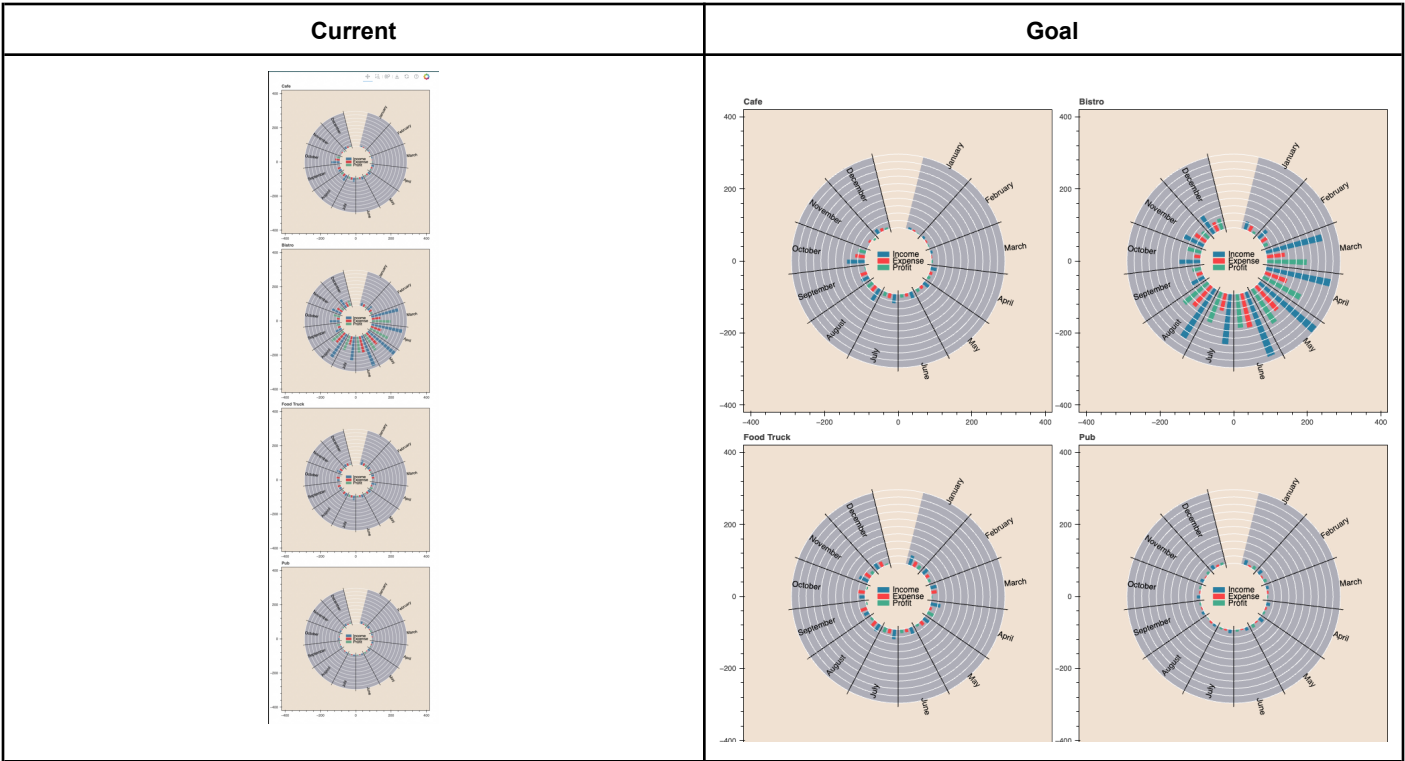

## Subtasks

To create the goal output, you have to do the following tasks.

Subtask 1:

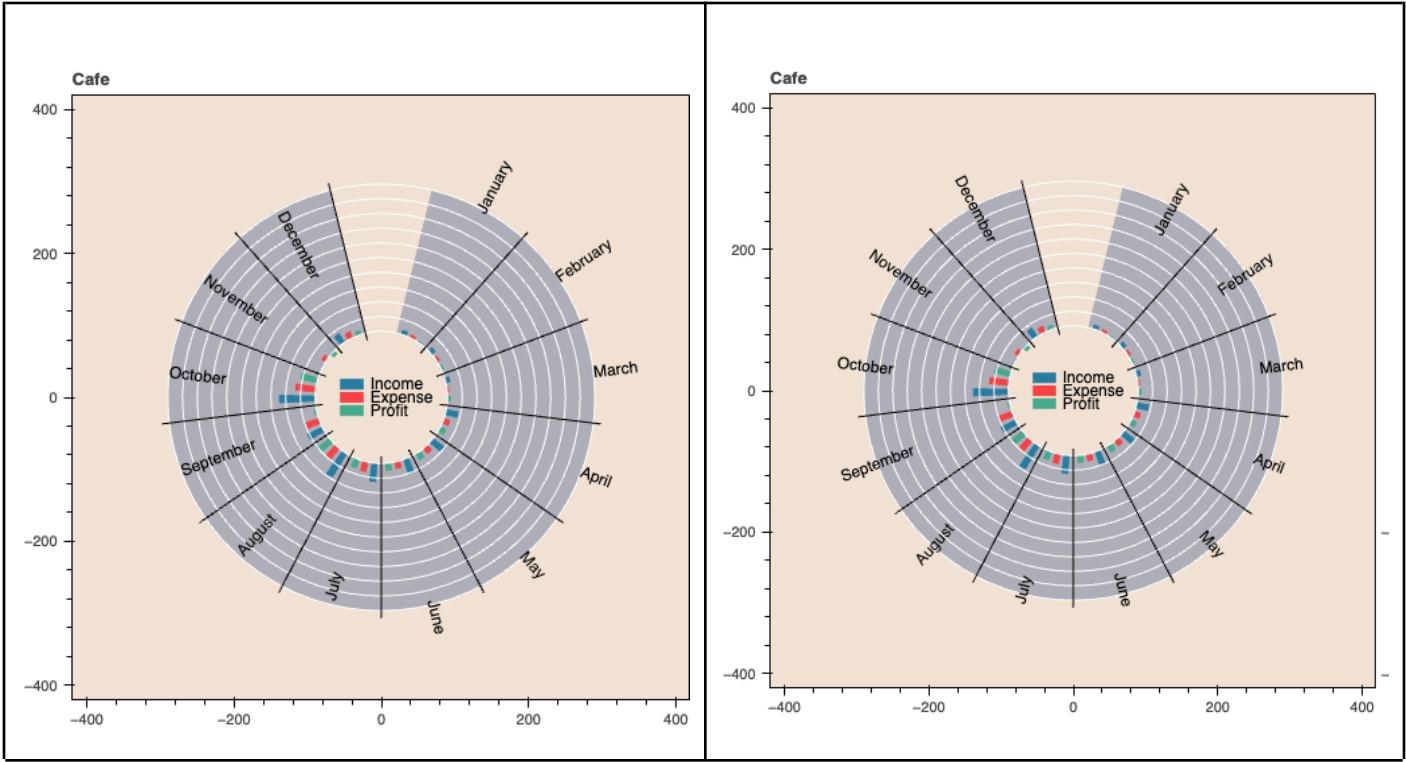

Display the four plots in a 2 x 2 grid.

Subtask 2:

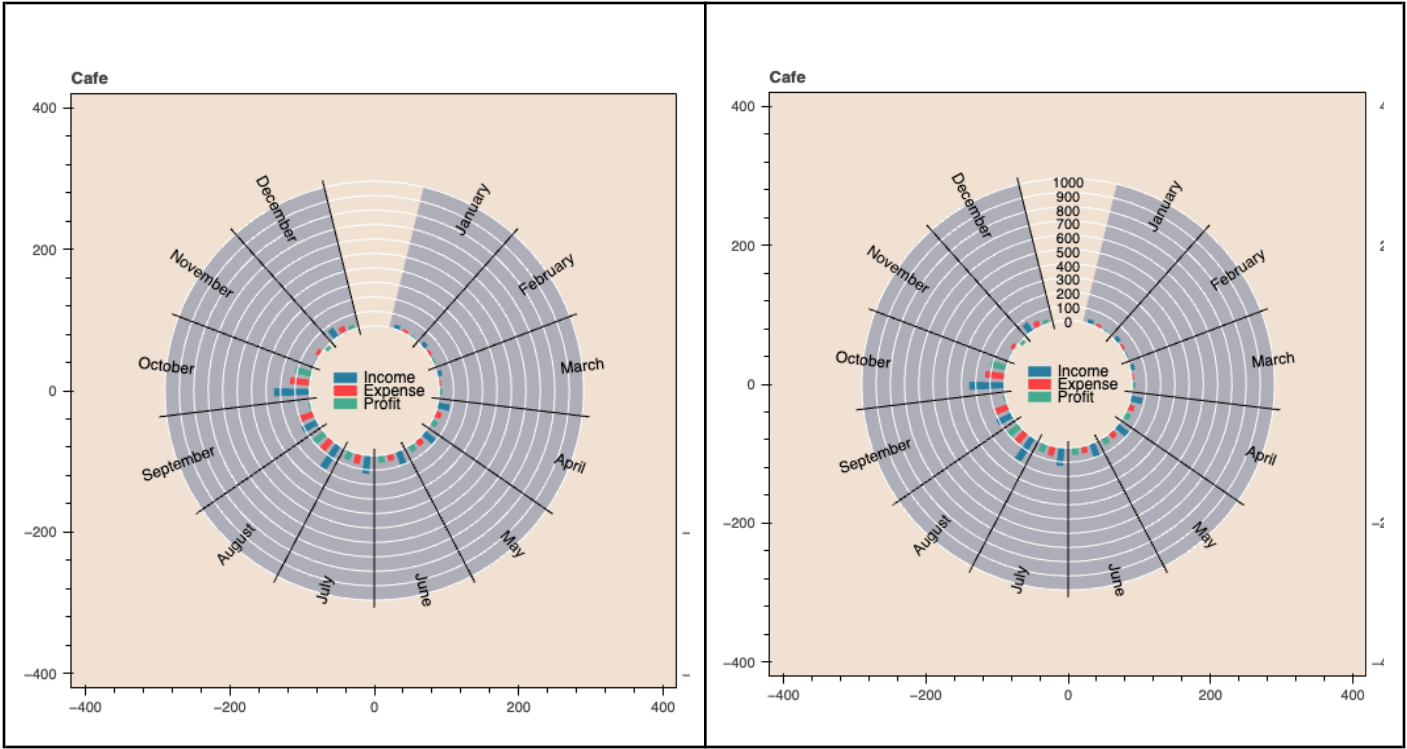

Make the text labels (January, February, ...) to be on the center of each month section.

Subtask 3:  
Add text labels (0, 100, 200, ...) for the grids.

Current	Goal
---------	------

Subtask 4:  
Remove axis labels (-400, -200, ...).

Current	Goal
---------	------
